

**How many things there are in my Will which I have to give to creatures!
But they have to come into Its Kingdom in order to receive them.**

I was doing my acts, my little rounds in the Holy Divine Will according to my usual way. I myself see how I can do nothing but go around in It, in my dear inheritance, -given to me by my sweet Jesus.

In It there is so much to do and to learn, that

- neither my short life in the exile

- nor the whole of eternity

will be enough for me to fulfill all my offices in this most extensive inheritance.

Its boundaries cannot be seen – neither where It begins nor where It ends.

And the more one goes around in It, the more new things one learns.

However, many things can be seen but cannot be comprehended.

And one wants sweet Jesus, that He may give His explanations.

Otherwise one admires them, but cannot describe them.

So, surprising me while I was doing my acts in His adorable Will, my always **lovable Jesus told me:**

“My daughter,

look at how many things We issued in Creation with Our Fiat for the good of man’s nature:

everything that Our Will had established to issue – nothing was missing for Its fulfillment.

Everything that We were to release in Creation was established, and nothing was absent.

Everything that We were to issue for the good of souls was also established.

And in fact, **We did issue it.** And it was so great as to surpass by thousands and thousands of times all the goods that can be seen in the Creation.

But both

- those which were to serve the good of man’s nature and

- those which were to serve the good of his soul

everything remained deposited in Our Will.

Because We do not entrust Our things to anyone, knowing that Our Will alone would preserve them for Us, whole and beautiful, just as We delivered them from Our divine womb.

More so, since Our Will alone has the preserving and multiplying power

- which, while it gives, loses nothing and keeps all things in the place wanted by Us.

Now, **how many things there are in my Will which I have to give to creatures!**

But they have to come into Its Kingdom in order to receive them.

Just as the human nature could never partake in the goods of Creation

if it did not want to live under the heavens and have a place on earth, where the things created by Me surround it like a crown.

In the same way, if the soul does not come to live under the heaven of my Will, in the midst of the goods which Our paternal goodness issued in order to make her happy, to embellish her, to enrich her, she will never be able to partake in these goods .

They will be as though foreign and unknown for her.

More so, since each soul would be a distinct heaven,

which Our Supreme Will would delight in adorning

- with a sun more radiant and with stars brighter

than those which can be seen in Creation - one more beautiful than the other.
